

### MAXBond-p2p

Bonded ADSL Point to Point

SALES: 0844 561 6102

#### True Bonding

MAXBond-p2p is a bonded ADSL product aimed at organisations that have a requirement to securely link two locations together without the high costs of leased lines. Up to four business ADSL MAX lines per site can be bonded together to create a true 'fat pipe' connection giving symmetrical speeds of up to 3Mb/sec. The service is distant independent on costs and with a lead time of between 10 and 20 days, MAXBond-p2p is a fast-to-deploy, resilient and cost-effective solution.

MAXBond-p2p is a fully managed service which includes onsite installation by a Waveworks' Network Engineer who can advise about the basic configuration needed to connect internal networks to the MAXBond-p2p service.

#### Performance

MAXBond-p2p is a high-speed, large capacity 'point-to-point' connection offering a true 'fat-pipe' performance by aggregating network traffic on a packet-by-packet basis across multiple ADSL MAX connections. By transmitting data in this way the MAXBond-p2p service can operate at the combined speed of the available lines offering a synchronous performance of up to 3Mb/sec.

#### Flexibility

MAXBond-p2p is available in two bandwidth configurations and offers a simple, transparent upgrade path - enabling you to 'flex' up bandwidth as your requirements grow.

#### Resilience

The use of multiple ADSL MAX lines allows the service to continue to operate even if there is a line fault (albeit at lower bandwidth) as long as at least one line remains usable. The service operates over a resilient business broadband network providing a business-class performance between the two locations.

#### Management

All MAXBond-p2p solutions are fully managed end-to-end by Waveworks and includes the provisioning of PSTN lines. Waveworks continually monitor each MAXBond-p2p service 24x7 to ensure that the best possible service is achieved. In the unlikely event of bonding hardware failure at a remote site a pre-configured replacement will be delivered the next working day<sup>1</sup> to minimise any outage impact. Higher levels of support are available for more critical applications.

#### Features

- ▶ High-speed symmetrical connections
- ▶ Securely authenticated tunnels
- ▶ Integrated firewalls
- ▶ Monitored 24x7
- ▶ Upgradeable at any time
- ▶ Technical support help desk

#### Benefits

- ▶ Your connection is more resilient through use of multiple lines
- ▶ Distant independent pricing
- ▶ No internal expertise needed
- ▶ Fully managed provisioning

## Products & Services

MAXBond-p2p is configured as either a two line per site or four line per site solution. See the matrix below for a product overview...

Product	MAXBond -p2p/N2	MAXBond -p2p/N4
Broadband	Business MAX Network x4	Business MAX Network x8
PSTN Lines	4 (included)	8 (included)
Bandwidth <sup>2</sup>	1.5Mb/sec	3Mb/sec
Basic Firewall	Yes	Yes
Enhanced Firewall <sup>3</sup>	Optional	Optional
Support	StandardCare	StandardCare

### Support

MAXBond-p2p comes with StandardCare support that covers normal office hours Mon-Fri, 9.00-5.00 with a 4 hour response.

If you require a higher level of support please ask for details of our PrimeCare or 24/7Care support.

<sup>1</sup> Subject to fault acceptance prior to 3.00pm

<sup>2</sup> Maximum speed/capacity quoted - actual speed/capacity is dependant upon line quality, distance from the exchange and exchange capacity. Unlimited usage is subject to Waveworks' Fair Use Policy.

<sup>3</sup> Charges apply for bespoke configurations.
